

<b>Model No</b>	LOL0020
<b>Application</b>	Spread / Area Light
<b>Description</b>	LED Composite spread area light on spike
<b>Lamp</b>	Warm white LED (3000K)*
<b>Wattage</b>	4W**
<b>Voltage</b>	12V AC

<b>Finish</b>	Polyester powder-coat finish available in many colours
<b>Mounting</b>	Fixture may be mounted into threaded hubs in junction boxes, ground stakes, tree- mount boxes, or mounting canopies
<b>Fasteners</b>	Stainless Steel
<b>IP</b>	TBA

<b>Dimensions</b>			
Type I***	127	x 52 (+)	x 97
mm	W	x D	x H

#### Notes

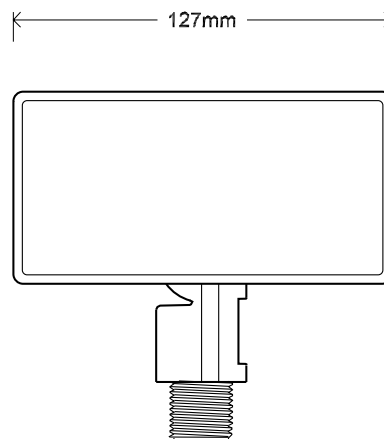

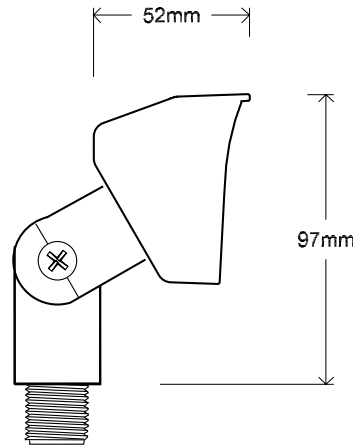

\*4000k & 5000k available as well

\*\* call for other options

\*\*\* See LOL0398 for smaller version

#### Detailed description

Powerful and compact, this low voltage flood light fixture is constructed of injection-molded, fiber-reinforced composite for strength and high UV stability and is warranted for ten years against corrosion. The hinged shroud opens easily for lamp maintenance and is fitted with a silicone gasket to ensure a superior weather-tight seal under harsh conditions. A clear, tempered, shock and heat resistant soda-lime glass lens safeguards the lamp and optics. A super durable polyester powder-coated finish is applied and available in 13 standard colors. The intelligently engineered fully adjustable knuckle is made from injection-molded, fiber-reinforced composite which effectively isolates the fixture from the harmful corrosive soil.

Type I

Spike Mount

**Note:** All dimensions and other specifications can change without notice. Please contact Light On Landscape to confirm the availability and current specifications of this luminaire.

**Installation:** Light On Landscape strongly recommend that all luminaires be correctly installed and maintained. Failure to do so will result in the voiding of the manufacturer's warranty and the reduced efficiency, performance and life of the fixture. To eliminate voltage drop, we advise that the recommended UV stabilized cable and run lengths are used, along with soldered joints, heat shrink connectors and quality lamps.
